LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS TO BE USED

Area served by South Sound Utility Company, Inc. within Section 1 and 2, T. 18 N., R. 1 W.W.M., Thurston County.

DESCRIPTION OF PROPOSED WORKS

Proposed Classic Heights Well No. 2, estimated 8" x 295'. Two 7½ horsepower submersible pumps 100 gpm each discharge to 40,000 gallon storage.

DEVELOPMENT SCHEDULE

BEGIN PROJECT BY THIS DATE:

October 1, 1994

COMPLETE PROJECT BY THIS DATE:

October 1, 1995

WATER PUT TO FULL USE BY THIS DATE:

October 1, 1996

PROVISIONS

Installation and maintenance of an access port as described in WAC 173-160-355 is required. An air line and gauge may be installed in addition to the access port.

This well shall be cased and permanently sealed to a minimum depth of 18 feet below land surface. Such sealing shall be performed in accordance with the provisions and standards of Chapter 173-160-265 WAC (Minimum Standards for Construction and Maintenance of Water Wells).

A completed well report of the well shall be submitted by the driller to the Department of Ecology within 30 days of completing this well. All pump test data for this well shall be submitted to the Department as it is obtained.

An approved metering device shall be installed and maintained in accordance with RCW 90.03.360, WAC 508-64-020 through -040. Meter readings shall be recorded at least monthly.

All water wells constructed within the State shall meet the minimum standards for well construction and maintenance as provided under RCW 18.104, Washington Water Well Construction Act of 1972, and Chapter 173-160 WAC, Minimum Standards for Construction and Maintenance of Wells.

The Water Resources Act of 1971 specifies certain criteria regarding utilization and management of the waters of the state in the best public interest. Use of water may be subject to regulation at certain times, based on the necessity to maintain water quantities sufficient for preservation of the natural environment.

In accordance with WAC 173-160-205, wells shall not be located within certain minimum distances of potential sources of contamination. These minimum distances shall comply with local health regulations, as appropriate. In general, wells shall be located at least 100 feet from a sewer, septic tank, privy, or other source of contamination. Wells shall not be located within 1,000 feet of a solid waste landfill.

The Permittee is advised that notice of proof of appropriation of water (under which the final certificate of water right is issued) should not be filed until the permanent diversion facilities have been installed, and the system is currently in use. This includes installation of a mainline system capable of delivering the recommended quantity of water to an existing or proposed distribution system within the area to be served, and fulfillment of all other terms of this permit.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or fail to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand and the seal of this office at Olympia, Washington,

this 1 day of December, 1992.

Fred Olson, Acting Director
Department of Ecology

ENGINEERING DATA

OK gb

by Joe Blomston

This permit is subject to the implementation of the minimum requirements established in the Interim Guidelines for Public Water Systems Regarding Water Use Reporting, Demand Forecasting Methodology and Conservation Programs, July 1990, and as revised.

Under RCW 90.03.005 and 90.54.020(6), conservation and improved water use efficiency must be emphasized in the management of the states water resources, and must be considered as a potential new source of water. Accordingly, as part of the terms of this permit, the applicant shall prepare and implement a water conservation plan approved by Department of Health. The standards for such a plan may be obtained from either the Department of Health or the Department of Ecology.
